

BUDDYUP

A Internship Project by C.SaiAnjan

At Exposys Data Labs

Full Stack Developer

Project Details

Application details:

- **App Title:**BuddyUp
- **Platform:**Android
- **Programing Language:**Java

Features:

- Find new People with similar Interests.
- Can Say Hello and send messages to People.
- The App uses Firebase and data can be accessed at all time.

What is a Chatting?

Chatting refers to the process of communicating, interacting and/or exchanging messages over the Internet.

What is a Chat Application?

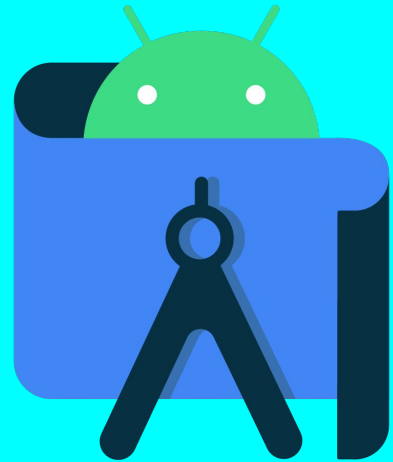

Chat Application is a program with which Users can communicate directly with other Users on the Internet who are online through the Internet.

With Chat Application Users can communicate with anyone, at anytime and anywhere.

BuddyUp is an Chat application built in Android Studio for android devices.

Android Studio

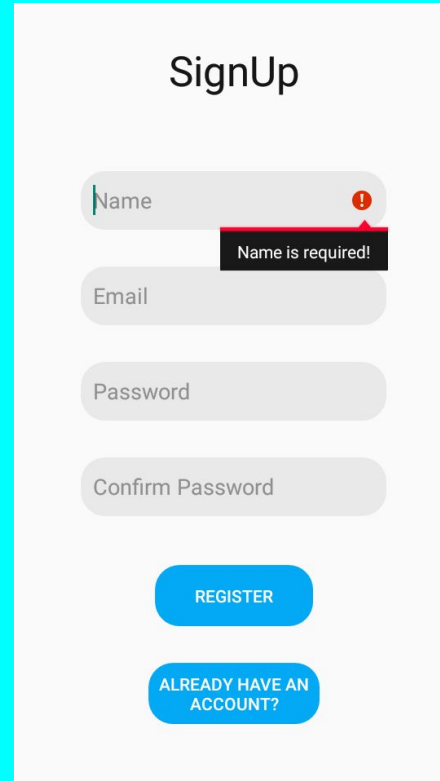

Android Studio is the official integrated development environment for Google's Android operating system, built on JetBrains' IntelliJ IDEA software and designed specifically for Android development. It is available for download on Windows, macOS and Linux based operating systems.

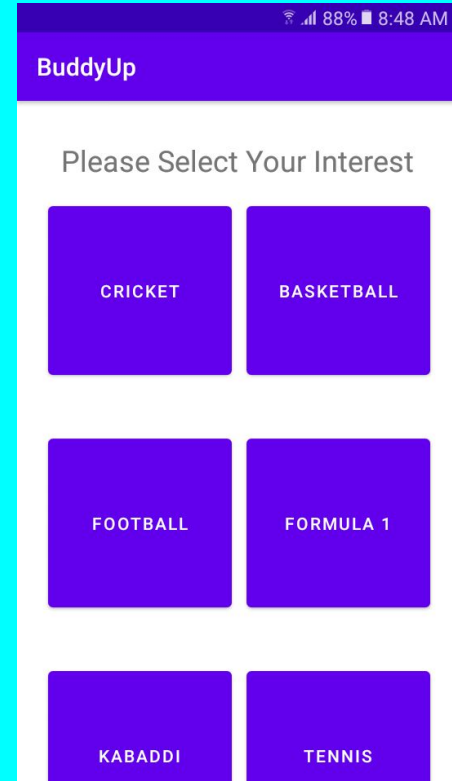

BuddyUp App

BuddyUp App first requires an account for user to access the app and the messages in the app.

After Signing up the user has to select their Interest and then can find people and start chatting with their friends.

The Sign Up screen features a title 'SignUp' at the top. Below it are four input fields: 'Name', 'Email', 'Password', and 'Confirm Password'. The 'Name' field has a red error message 'Name is required!' displayed below it. At the bottom, there are two buttons: 'REGISTER' and 'ALREADY HAVE AN ACCOUNT?'.

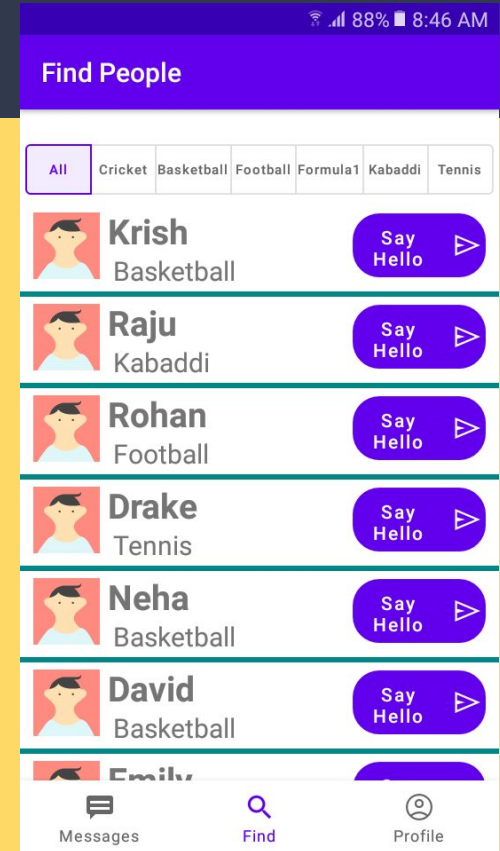

The Interest Selection screen has a title 'BuddyUp' at the top. Below it is the text 'Please Select Your Interest'. There are six buttons arranged in a 3x2 grid: 'CRICKET', 'BASKETBALL', 'FOOTBALL', 'FORMULA 1', 'KABADDI', and 'TENNIS'.

Features of BuddyUp

The main feature of the App is that you can find People with common interests and send them a **Hello** request.

After finding People with common interests and sending Hello request Users can Chat and send Messages to each other through the App.

Conclusion

*It has been a wonderful experience building this App. Many more features can be added this App like last seen, changing profile picture and message delivered time etc.
Thank you for giving me this great opportunity.*

Thank You
